

CHAPTER 6: ELECTROMECHANICAL EQUIPMENT

CONTENTS

6	Electromechanical equipment.....	154
6.1	Powerhouse.....	154
6.2	Hydraulic turbines.....	156
6.2.1	Types and configuration.....	156
6.2.2	Specific speed and similitude.....	168
6.2.3	Preliminary design.....	171
6.2.4	Turbine selection criteria.....	174
6.2.5	Turbine efficiency.....	181
6.3	Speed increasers.....	184
6.3.1	Speed increaser types.....	184
6.3.2	Speed increaser design.....	185
6.3.3	Speed increaser maintenance.....	186
6.4	Generators.....	186
6.4.1	Generator configurations.....	188
6.4.2	Exciters.....	188
6.4.3	Voltage regulation and synchronisation.....	189
	Asynchronous generators.....	189
6.5	Turbine control.....	189
6.6	Switchgear equipment.....	192
6.7	Automatic control.....	193
6.8	Ancillary electrical equipment.....	194
6.8.1	Plant service transformer.....	194
6.8.2	DC control power supply.....	194
6.8.3	Headwater and tailwater recorders.....	194
6.8.4	Outdoor substation.....	195
6.9	Examples.....	196

LIST OF FIGURES

Figure 6.1	: Schematic view of a powerhouse –Low head.....	155
Figure 6.2	: Schematic view of a powerhouse –high and medium heads.....	155
Figure 6.3	: Schematic view of a hydropower scheme and of the measurement sections.....	157
Figure 6.4	: Cross section of a nozzle with deflector.....	158
Figure 6.5	: View of a two nozzles horizontal Pelton.....	159
Figure 6.6	: View of a two nozzle vertical Pelton.....	159
Figure 6.7	: Principle of a Turgo turbine.....	160
Figure 6.8	: Principle of a Cross-flow turbine.....	160
Figure 6.9	: Guide vane functioning principle.....	162
Figure 6.10	: View of a Francis Turbine.....	162
Figure 6.11	: Kinetic energy remaining at the outlet of the runner.....	163
Figure 6.12	: Cross section of a double regulated Kaplan turbine.....	164
Figure 6.13	: Cross section of a double regulated Bulb turbine.....	164

Description:

Dimensions: x
