Policy & Strategy development

We successfully develop and support the implementation of strategies and policies with governmental and non-governmental institutions. We create spaces for discussion between and with relevant stakeholders including governmental institutions, donors and non-governmental organisations and provide advice on decision making processes.

Our services include:

- development and formulation of strategies and policies in our areas of expertise
- advising governments and international organisations on strategy and policy development
- supporting and facilitating discussions on policy development

Based on our experience we give advice on both technical and process improvements to lead the strategy, policy and services delivery to measurable impact.
