# Skat - Sandec Environmental Sanitation

This project aimed at capitalizing Eawag/Sandec projects in the field of environmental sanitation (preparation of publications).

## Country:

Vietnam

## Project Period:

2007-2009

## Services Provided:

[Knowledge Sharing, Networking, Training & Capacity Development](#)

**Name of Client(s):**

Eawag/Sandec

**Description of the Project:**

The joint Skat & Eawag/Sandec project aimed at capitalizing on research results in the field of environmental sanitation, in particular with regard to applying the method of material flow analysis as a tool for environmental sanitation planning.

Skat participated in the NCCR (National Centre of Competence in Research) North-South review **workshop** in February 2008 in Hanoi (presentation of research results on material flow analysis and urban agriculture, organization of a project field visit in Hanoi). Moreover, Skat prepared an NCCR **synthesis publication** on environmental sanitation (summarizing various case studies in Thailand, Vietnam, and China), and produced a publication (**Material Flow Analysis Tool**, incl. CD) to support planners and engineers applying the method of material flow analysis in the field of environmental sanitation planning.
