

UN Habitat - Urban Energy Systems invited Skat's expert [Daniel Wyss](#) to share a best practices in low-carbon housing design at the [UN Climate Change Conference in Egypt COP27](#). In two sessions, he presented Skat's [Proecco-project](#) in Eastern Africa. It aims at inclusive transformation of informal urban settlements and establishing Eco Industrial Parks for city-wide supply of green and affordable housing. The great interest in this topic soared already at the [World Urban Forum](#) in Katowice this summer.

Link to the presentation (Daniel Wyss starts at 44'): "Towards Net Zero Carbon Architecture in Africa / Vers une architecture zéro carbone en Afrique" <https://youtu.be/ESNzZB2cmRc>
