Vision & Mission

Vision

Our vision is of a world where current and future generations have the means to fulfil their basic human needs and human rights.

Mission

Skat is committed to the reduction of poverty through the promotion of sustainable livelihoods and the improvement of the living conditions of disadvantaged and marginalised people.

We apply our expertise in development cooperation in an integrated manner, taking into account technical, social and economic issues. Planning, design and implementation of projects are undertaken through participatory approaches that take perceptions of all stakeholders into account in order to foster sustainability and accountability for better and long-lasting impacts.
