

AGUASAN Workshop Topics 1984 - 2015

N°	Titles	Date
0	Appropriate Technologies in Water Supply and Sanitation	1984
1	Water Decade: Drinking Water and Wastewater Problems in Developing Countries	1985
2	Participation and Animation	1986
3	Sanitation and Health	1987
4	Operation and Maintenance: Activities and goals relevant for maintaining of village supply systems and latrines	1988
5	Monitoring and Evaluation in Drinking Water and Sanitation Projects.	1989
6	Sustainability of Drinking Water Supply and Sanitation Projects: What is sustainability, in what fields can it be achieved, what are its guidelines, what has to be done to make a project sustainable?	1990
7	Communication in Development Cooperation: Communication and its various aspects in development work	1991
8	Water and Sanitation Knowledge System: Development of water and sanitation knowledge systems for better preparation and implementation of WatSan projects	1992
9	Water is Not a Free Resource (anymore) – Who Pays? About the problems of financing water supply & sanitation systems	1993
10	Sustainable Water and Sanitation Projects through Fair Negotiations: Importance of well conducted discussions during preparation and implementation of water and sanitation projects in order to ensure their sustainability	1994
11	Urban Sanitation: The challenge to communities, private sector actors, local governments and external support agencies	1995
12	Transfer of Ownership in Water Supply and Sanitation Systems: Community ownership of water supply systems, which is essential to user participation, and to the sustainability of these systems	1996
13	Less Water for More People: How to tackle and avoid conflicts around global water scarcity in the field of international development cooperation	1997
14	Technology and Balanced Development: All involved organisations, professionals and users are bound to contribute to sustainable drinking water supply and sanitation systems	1998
15	Private Sector – Just a (new) Hope? Whether and how the private sector can contribute effectively to cover the needs in the water sector and whether the market economy is suitable to work in programmes of poverty alleviation	1999
16	HCA – the Household-Centred Approach: A new way to increase the sustainability of water and sanitation projects?	2000
17	From Sector Reform to Sector Revolution: A new (and revolutionary) approach is needed in order to ensure sustainable operation and maintenance of installed systems	2001
18	Profits for All – Service for All: Innovative approaches and management options for equitable and sustainable drinking water and sanitation services	2002
19	This Shit Drama – are there Ways Out? Innovative approaches for practical solutions to a dirty and deadly issue that has been taboo for too many decades	2003
20	Sustainable Services Without External Support – Still a Challenge! What is needed so that sustainable services are guaranteed after withdrawal of external resources?	2004
21	Caring and Integrated Management for Sustained Water and Sanitation Services: Conserving existing services allows future investments in upgrading and scaling up.	2005
22	More Benefits for Households from Water and Sanitation through Intersectoral Synergies: Can the impact on poverty be improved by linking W&S with health and income generation?	2006
23	Opportunities and Challenges for the Water and Sanitation Sector in a Decentralised Context	2007
24	Is Community Management Enough to Sustain the MDG Efforts? Alternative management approaches for sustainable rural water supply services.	2008
25	The WatSan Contiguum: Towards a more dynamic Interaction between Emergency relief, Rehabilitation and Development.	2009
26	From “Haute Cuisine” to “Good Fast Food”: Taking advantage of the Momentum for Large Scaling Up in the Water Supply and Sanitation sector.	2010
27	Water and Sanitation are Human Rights – So What? Implications and actions needed to put the rights into practice.	2011
28	Financial Sustainability of WASH Services: About mind-set change and an eye for the future.	2012
29	Meeting the Challenge of WASH in Health Facilities: Fostering synergies between the health sector and community care.	2013
30	Water Challenges Beyond WASH - Bridging the Water, Food and Energy Sector Divides: Towards concerted approaches that address trade-offs and build synergies across sectors and their actors.	2014
31	Disaster Risk Reduction in WASH - Towards Resilience and Adaptive Management in the Water Sector	2015
